

Standing Cube

1. Use two sheets of the same size paper. Fold each like a *hamburger*. However, fold one side one-half inch shorter than the other side. This will make a tab that extends out one-half inch on one side.
2. Fold the long side over the short side of both sheets of paper, making tabs.
3. On one of the folded papers, place a small amount of glue along the small folded tab next to the *valley*, but not in it.
4. Place the non-folded edge of the second sheet of paper square into the *valley* and fold the glue-covered tab over this sheet of paper. Press flat until the glue holds. Repeat with the other side.
5. Allow the glue to dry completely before continuing. After the glue has dried, the cube can be collapsed flat to allow students to work at their desks.

Use the cube for organizing information on four things. Use 11" × 17" paper to make larger project cubes that you can glue other foldables onto for display. Notebook paper, photocopied sheets, magazine pictures, and current events articles can also be displayed on the larger cubes.
